

Baby rights

Babies are endowed by our creator with certain unalienable rights just like every one of us including the right to:

- Life, liberty, and the pursuit of happiness;
- A healthy mother and father, mother's love, and mother's milk;
- A healthy environment, a healthy country, a healthy planet;
- Freedom from toxic chemicals injected by needle before an immune system is strong enough to deal with the onslaught;
- Freedom from hundreds of manmade chemicals that pollute a bloodstream even before birth (Environmental Working Group - Red Cross study);
- Churches that teach and support baby rights including healthy agriculture; healthy food, air, and water; healthy medicine, and healthy religion upon which *all things clean and holy depend*.

We are dedicated to the teaching and support of baby rights and all organizations and persons that support baby rights with respect to the issues described above as well as other issues related to the sanctity and wholeness of life.

You can help by reading documents *free to download* from home page at www.phpower.org – [click to return to home page](#). To support our mission and for immediate access to a get started kit use the secure Paypal link on bottom of **Body and Soul repair** page.
